

Laptop and BYOD Standard

Owner: IT Operations. Applies to all Lumora Systems employees and contractors.

Standard Laptop Issue

Every new employee receives a company-managed laptop on or before their first day. Engineers receive a MacBook Pro with 36 GB of memory; all other roles receive a MacBook Air with 16 GB of memory. Windows laptops are available on request for roles that require them.

Laptops are refreshed every 3 years. Employees may request an early replacement if the device fails the hardware diagnostic or can no longer receive security updates.

Device Management

All company laptops are enrolled in Kandji mobile device management (MDM) before they are shipped. Removing or disabling the MDM profile is a violation of the Information Security Policy and is reported to the Security team automatically.

Bring Your Own Device (BYOD)

Personal phones and tablets may be used to access email, calendar and Slack only after they are enrolled in the Lumora BYOD program through the Intune Company Portal app. Enrolled personal devices must run a supported operating system version and use a passcode of at least 6 digits.

Personal laptops and desktop computers must never be used to access internal systems, source code or customer data.

Lost or Stolen Devices

Report a lost or stolen laptop or enrolled phone to IT through the #it-help channel immediately, and in any case within 1 hour. IT will lock and remotely wipe the device. A replacement laptop is shipped within 2 business days.

Peripherals

Employees may order one external monitor, a keyboard, a mouse and a headset through the IT Service Portal. Additional peripherals can be purchased with the home office stipend.
